Punching Above Your Weight cuts through the AI hype to teach you how to use these powerful tools without losing your mind or your humanity. Written with grit, clarity, and humor, it shows professionals and creatives how to work smarter in a world moving faster than ever. Ryan J. Smith blends sharp strategy with grounded wisdom to help you fight smarter, not just harder. This is the AI guide for everyday fighters who want to stay real while staying ahead.

Ryan J. Smith is an AI product leader, musician, and author based in Chicago. A self-taught software developer with an AI certificate from MIT, he writes with grit and clarity to help people use AI without losing their humanity.
